Bespoke glazing opens
endless opportunities in
transforming spaces, both
aesthetically and functionally.

Door & Window Glass

The smart choice for both residential and commercial projects and energy-conscious glass solutions.

Double Glazing

Double glazing helps to ensure your home stays warmer in the winter and cooler in the summer, helping to lower energy bills and reduce your carbon footprint.

The two panes of glass separated by a sealed insulating gap to significantly reduce heat loss, minimise external noise, improve energy efficiency and enhance indoor comfort, making it an essential choice for modern residential and commercial buildings alike.

Triple Glazing

For optimum safety and enhanced features including noise reduction, thermal efficiency and reduced heat transfer, this glass is an excellent upgrade from the standard double glazing.

The three panes of glass are separated by two sealed insulating gaps significantly reducing heat loss, minimising external noise and improving energy efficiency over double glazing, making it an essential choice for modern residential and commercial buildings alike.

Laminated Glass

Laminated glass is ideal for double glazed units where enhanced security or safety is required, such as PAS24 compliance. It helps resist forced entry, reduces the risk of injury from breakage and can improve noise reduction and UV protection.

PermaGlaze 1.2 Low-E

Manufactured to the highest standards, our low-emissivity double glazed units offer impressive thermal performance. Offering advanced U-values and enhanced safety, this glass type is a popular option when safety is paramount.

PermaGlaze 1.0 Ultra-Low E

Ultra-Low E Glazing brings a high-performance glass solution with extra energy efficiency. Reaching impressive U-values and offering reduced heat transfer, it is a popular option among many home improvement products.

PermaGlaze SolarOne 70/35

Solar control glass is perfect where improved energy efficiency is key. It helps reduce solar heat gain, lowers cooling costs, and increases comfort by maintaining consistent internal temperatures while still allowing natural light. Suitable for both double and triple glazed applications.

Oversized Glass Units

Offering seamless, expansive views, oversized glass units are perfect for those larger projects to maximise natural light and create stunning, open spaces.

We specialise in producing oversized glass units at remarkable flexibility with minimal restrictions.

Our advanced facilities allow us to deliver high-quality, custom-sized glass solutions that elevate both aesthetic appeal and functionality, making them an ideal choice for innovative architectural designs.

Every unit of oversized glass from our factory showcases our dedication to quality. Equipped with advanced machinery and a team of skilled specialists, we ensure the highest precision and quality.

All our oversized units can be delivered direct to site across mainland UK.

Self-Cleaning Glass

Self-cleaning glass is an innovative, low-maintenance solution designed to keep glazing clearer for longer. Using advanced surface coating, it reduces the build-up of everyday dirt, delivering cleaner glass with minimal effort.

Activated by natural daylight, the specially treated outer surface breaks down organic dirt, allowing rainwater to wash it away evenly without streaks. This smart technology makes self-cleaning glass ideal for hard-to-reach installations such as rooflights, skylights and large glazed areas.

With ClearGlaze and BlueGlaze options, self-cleaning glass combines practicality with modern aesthetics. It's the perfect choice for projects that demand clear views, maximum natural light and reduced maintenance without compromising on performance or design.

Sovu Integral Blinds

Sealed within the glass unit, our Sovu integral blinds are an ideal solution for those looking for low-maintenance privacy options.

Unlike traditional blinds, Sovu blinds are sealed within the glass unit, keeping them free from dust, allergens and damage - the perfect solution for any space where cleanliness is essential.

Not only do they offer exceptional insulation with our double glazed units, but being sealed within the unit means they are also protected from wear and tear and stand the test of time. Operated via a battery-powered control unit, the blinds offer easy and effortless opening, making them suitable for any window or door unit.

Additionally, with optional remote operation, lighting levels can be adjusted at the click of the button.

Elevate your space by choosing seamless blinds for ease, convenience and style.

With smooth manual and motorised control operations, the bespoke blinds limits are built to last, with long-lasting durability and maximum performance.

Their advanced style is also available in multiple design options, including an array of colours to elegantly blend with your room. The blinds are available as a venetian blind, pleated blind and blackout honeycomb blind, to suit the aesthetic of multiple spaces, both residential and commercial.

Integral blinds are the perfect solution for controlling heat and glare from the sun, our partnership with industry experts ensure the most trustworthy systems are used, for the best views and privacy control.

Fire Rated Glass

For safety and style, our premium bespoke fire-rated glass provides superior performance without compromising on aesthetics.

An essential choice for buildings requiring advanced fire safety protection, our fire rated glazing solutions are manufactured to withstand extreme heat.

They also prevent the spread of flames, smoke, and toxic gases, crucial for safe evacuation and minimising damage. Our fire-rated glass can be tailored to suit your project including double glazed and toughened options, perfect for all applications where fire safety is essential.

Designed to withstand high temperatures and maintain its structure, every unit is fully compliant with UK regulations for fire safety. With integrity for up to 120 minutes and insulation for up to 120 minutes, every property is safe with our fire-rated solutions.

Acoustic Glass

Creating acoustic comfort, one bespoke glass unit at a time.

Whether you're in the centre of a busy city or office, close to main roads, or just seeking a more peaceful indoor space, acoustic glass provides noise reduction while enhancing natural light and transparency throughout.

Manufactured specifically to minimise any sound transmission, this glass type is ideal for homes and environments where peace and quiet is rare.

Available in multiple thicknesses, acoustic glass is suitable for single, double and triple glazed applications.

Glass Balustrades & Balconies

For classic and elegant glass barriers that transform both outdoor and indoor applications.

Architectural glass solutions, including balustrades, partitions, and facades, combine modern aesthetics with outstanding performance. Using toughened and laminated products these systems provide strength, transparency, and durability - creating open, light-filled spaces without compromising on protection.

Perfect for:

- Frameless Systems
- Fixed Systems
- Balustrades
- Balconies

Glass Canopies

Adding curb appeal to any property entrance, glass canopies combine practical solutions with a modern day design.

Enhance your building's entrance with a sleek glass canopy. Designed for durability and safety, yet providing a stylish and practical shelter. With a clean contemporary look, it adds a premium finish while keeping your space bright and inviting. Can be manufactured using toughened or toughened laminated glass allowing for design flexibility on your project.

Please note: UKO Glass supplies the glass unit only. Our specialist glass solutions are suitable with most fixing options, but we do not supply the fixings themselves.

Decorative Glass

Elegant and sophisticated, our decorative glass products are expertly handcrafted to showcase even the most unique personalities.

Bringing the opportunity to transform spaces with unique styles, our decorative glass options offer endless possibilities to reflect your unique vision.

Whether you're redesigning a property, adding personal touches to a workspace, or creating a statement piece for a commercial building, we take pride in delivering top-notch bespoke glass solutions, with a focus on energy efficiency.

So many possibilities, including:

- Switchable Glass
- Conventional & Structural Balustrade
- Standard & Coloured Mirrors
- Sandblast Designs

Walk On Glass

We specialise in the manufacture of bespoke walk-on glass panels designed to combine safety, style and structural integrity. Our walk-on glass can be tailored to suit your project's specific needs, with the option of many combinations of design and practicality.

Whether you're looking to create a feature floor, a walk on rooflight, or viewing platform, a walk-on glass panel can transform your ordinary space into a visually stunning, light-filled environment.

Engineered to safely support foot traffic, it can be seamlessly integrated into architectural features such as floors, staircases and insulated glass units, delivering enhanced safety alongside design flexibility.

Glass Partitions

Our glass partitions are designed to transform commercial and interior spaces with a sleek, modern aesthetic while maximising natural light and openness.

Ideal for offices, retail, and hospitality environments, they help define meeting rooms and work zones without visual barriers, supporting productivity and a contemporary feel.

Our partitions are made to order, with customisation options including toughened, laminated and acoustic glass.

Glass Splashback

Our glass splashbacks combine contemporary design with everyday practicality, making them a stylish and functional addition to any kitchen or interior space.

Manufactured from high-quality toughened safety glass, each splashback is designed to withstand high temperatures, moisture, and daily wear while maintaining a sleek, seamless finish. Unlike tiled alternatives, the grout-free surface is easy to clean and hygienic, helping to keep kitchens looking pristine with minimal maintenance.

Toughened for safety and fully conforming to British Standards, our splashbacks deliver long-lasting performance alongside modern appeal.

Available in any standard RAL colour.

Mirror Glass

Mirror glass can dramatically transform a space by creating the illusion of depth and openness.

By reflecting light and surroundings, mirrors make rooms appear larger and brighter, enhancing both natural and artificial lighting.

Beyond aesthetics, mirror glass serves practical purposes, such as in gyms, where it allows individuals to monitor their technique during exercise. In addition, mirrors are commonly used in bathrooms, and retail spaces, making them a staple in both residential and commercial design.

Our mirror glass is available in many options including silver, bronze, grey, antique and more.

Float Glass

Float glass is the foundation of modern glazing, delivering exceptional clarity, consistency and versatility.

Manufactured to achieve a perfectly flat, smooth surface, float glass provides a high-quality finish that enhances both residential and commercial spaces.

Our float glass offers excellent light transmission and visual transparency, making it ideal for applications where clarity and precision matter. Its uniform composition ensures reliable performance and a flawless appearance across every panel.

Highly adaptable and expertly produced, float glass is the starting point for countless glazing solutions, with quality, simplicity and dependable results every time.

Why Trust Us?

As manufacturers of specialist, high-performance and fire-rated glass products, our team at UKO Glass are dedicated to delivering high-quality goods on time, with excellent customer service.

By utilising our wide array of advanced machinery, we stand out from the crowd, producing products others cannot replicate.

Our capability to incorporate intricate details and bespoke designs ensures that your project always reaches the desired outcome. When faced with unique and unconventional requirements, trust UKO Glass to be your reliable solution provider.

Find Solutions That Redefine What's Possible

UKO Glass is dedicated to excellence and customer satisfaction, serving retail, commercial, and public sector developments across the UK.

Our partnerships with industry leaders Saint-Gobain highlight our commitment to quality. Alongside offering a diverse range of advanced glass solutions, we also provide tailored customer support and advice, helping to create bespoke solutions for your unique projects.

With our specialist team of experts, we are able to handcraft all our products in-house, supplying you and your customers with all their specialist glass needs.
